

Leadership Tripod

A NEW MODEL FOR EFFECTIVE LEADERSHIP

The concepts in "Leadership Tripod" are a result of applying scientific principles and theories related to learning, decision making and leadership processes so that executives can retrain their minds to be more effective in dealing with the challenges and emotional dynamics of leadership and organizational change inherent in the world of business.

Leadership Tripod has been designed as a practical, applicable model for effective leadership. Instead of just talking about what effective leadership should be, the *Leadership Tripod* has been developed to show through a visual model the components needed for organizations, companies, leaders, as well as those selecting leaders to be able to improve through better leadership. Through the entire book the reader is given the chance to do self-reflection as well as a pre and post assessment of knowledge, skills and attitudes toward leadership. Case scenarios are also included with questions sets. The goal of this book for those who read it is to improve the leadership in their organizations, businesses and homes.

Dr. Al Long has been involved in leadership positions for over thirty years in both private and public organizations. He has developed his own Strategic Planning process as well as effective leadership strategies and analytical decision-making processes.

Al has extensive executive level hands-on experience in

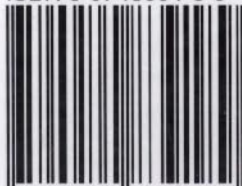

leadership and strategic planning in small to large companies.

Dr. Long is presently serving as Professor at Indiana Wesleyan University as well as Sales Manager for Containment Technologies Group, Inc. He is married to Carol Long; Area Representative of Fellowship of Christian Athletes in Indiana and has three sons and eight grandchildren.
